DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/27/06 has been entered.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18, 19 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 19, it is unclear what the phrase "and displacing parallelly to itself" means. Clarification is required. Also it appears "platform" in line 14 should be --transmission structure--.

Regarding claim 21, it is unclear what the phrase "and displacing parallelly to itself" means. Clarification is required. Also it appears that "platform" in line 14 should be --transmission structure—

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 18 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wiegard, et al.

Note carriages 6c and 6b and auxiliary carriage 6f.

Applicants' remarks regarding Wiegard, et al. have been deemed persuasive since the top end of rod 4f would pivot 1 about an axis through 3f.
